Land preparation and soil work. You may operate a tractor with an attachment (also called an implement) that works the soil or ground. Job names include disc, grader blade or smudge, X-plane, harrow and stick rake. Your host will tell you which tractor and attachment to use, where to work and what each job is for.

- **Roll-overs:** tractors can roll over, especially on slopes and banks, on rough or wet ground, near dams and channels, and with heavy or raised loads. The roll-over frame (ROPS) protects you only if you wear your seat belt, because the belt keeps you inside the frame. Some frames fold down for work under trees. A folded frame cannot protect you in a roll-over. Your host will show you when it may be folded down. Put it back up as soon as there is enough room, as you were trained.

- **PTO shafts:** some attachments are driven by the PTO (power take-off), a shaft at the back of the tractor that turns to power the attachment. A turning PTO shaft can catch clothing, hair or a hand and pull a person in. This can cause very serious injury or death. Before use, check that the PTO guards are in place and in good order. Never use a PTO with a missing or damaged guard: report it. Do not wear loose clothing, cords or jewellery, and tie back long hair. Keep yourself and others clear while the PTO is turning.

- **Blockages and loose guards:** if something blocks an attachment or a guard comes loose, stop and tell your supervisor. Before anyone goes near, the tractor and attachment must be shut down and made safe so they cannot start or move, using your host's procedure. Wait until all moving parts have stopped. Clear a blockage only if you are trained and authorised. Never restart with a loose or missing guard. Adjustments and repairs are separate tasks.

This sheet describes typical land preparation and soil work. Before you start, your host will give you the job description and safe work instructions for your actual duties, the PPE you need, a farm induction and training for your tasks. Follow those instructions. Do not do any work without the required PPE, training and authorisation. Complete the induction at every new farm, and get the instructions and training for every new task. **If anything is missing, unsafe or unclear, stop and ask your supervisor. You can also contact Orchard Tech.**

How the Tongan was prepared: Orchard Tech compared the English with Tongan-language materials published by Australian government agencies, such as WorkSafe Victoria and the Department of Employment and Workplace Relations, and other published sources. It used their words wherever possible and checked the Tongan by translating it back into English.
